

COR-08 Segment (Summary)

This is an early COR session, with no channeled entity.

COR talks with her master

COR meets her master. She is not from Earth and can't go home until her work is done. She understands she has an eye infection, which is foreign to the planet Earth, and will lose her eyesight if it's not taken care of. She must search for a man to help her, and he will know what needs to be done. She has been on Earth before, wasn't successful as she wanted to be. Four others will aid her in her work, which they all must get to quickly. Not much time left. She sees their work will be of no avail, and it saddens her. At least they can pave the way for others to follow. She takes a moment to be alone with her master.
